Square Lighting Fixture with Rounded Corners

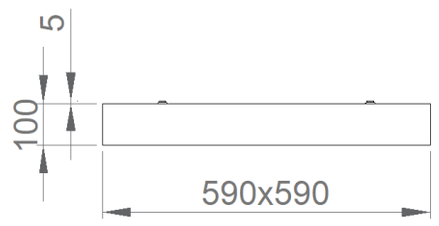

Style-600 is a surface-mounted lighting solution that adds an aesthetic and elegant look to modern interiors with its square form featuring soft, rounded lines instead of sharp corners. Its slim body and fluid corner transitions give the product a clean and contemporary character. It offers a practical solution for applications that do not require a suspended ceiling space.

It is ideal for offices, educational buildings, healthcare facilities, hotels, social areas, and commercial projects. With different power, color temperature, and control options, it adapts to project-specific lighting scenarios. Its soft geometry, high visual comfort, and simple design combine aesthetics and functionality in modern spaces.
