Flexible Optics, Powerful Performance

Star offers both general and accent lighting with its reflector that has different light angles. Its simple circular form and design that integrates with the ceiling create a clean and aesthetic look in architectural projects. The extruded aluminum heatsink and aluminum injection frame provide heat management, ensuring a long lifespan. The metallized reflector efficiently directs light, while the 13°-24°-40°-60° light angle alternatives make it suitable for various applications, from narrow-angle accent lighting to wide-area lighting.

It is suitable for shops, offices, hotels, showrooms, galleries, and commercial projects. With its high light quality, flexible optical options, and modern design, it combines performance and aesthetics.
