Minimalist Wall Sconce Shaped by Light

Calm is a modern wall sconce with a thick metal front panel and a central opening. The light source, concealed at the rear, is visible through the inner opening of the front panel, creating a soft and striking lighting effect on the wall.

It offers visual comfort thanks to its asymmetrical light distribution and low glare (UGR≤19). It highlights the architectural character of the space. The product can be mounted horizontally or vertically, allowing for various design scenarios in corridors, hotels, residential projects, social areas, and decorative wall applications. With its design that creates an effective atmosphere on surfaces rather than directly displaying light, it offers a stylish and modern solution for decorative lighting projects.
