Design Award-Winning - Directional Acoustic Lighting

Focus, awarded the Design Turkey Good Design Award, is an innovative hybrid solution that combines lighting and acoustic performance in a single product. Thanks to the integration of a linear lighting profile with vertical acoustic felt panels, it provides both high visual comfort and effective sound absorption in spaces.

It allows for the creation of different lighting scenarios according to the application by directing the light output. With different felt colors and panel sizes that can be customized according to project needs, Focus offers an aesthetic, functional, and award-winning solution for open offices, meeting areas, educational buildings, and social living spaces.
