

STYLE-P 1230

03137

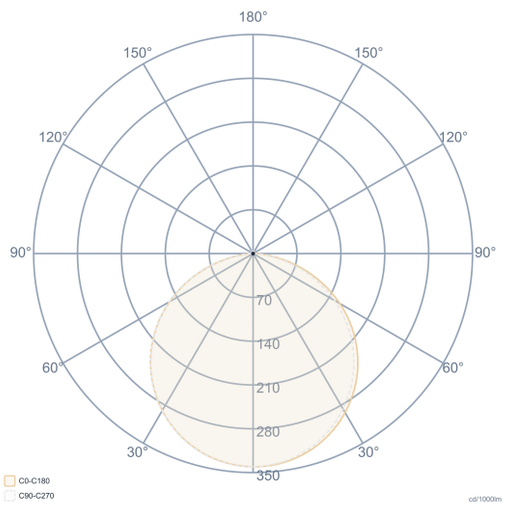

Modern Lighting with a Curved Form

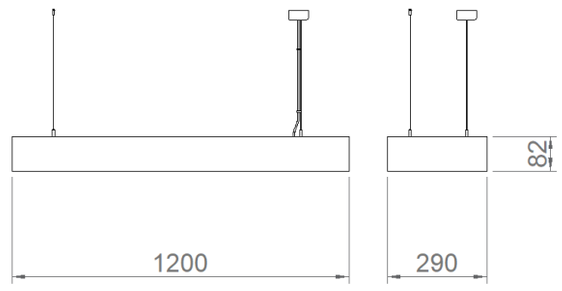

Style P 1230 Series offers a strong and contemporary design language with its wider body structure and smooth radius edge transitions. The soft surface transitions replace sharp lines, creating a clean and premium appearance while providing uniform and comfortable illumination through its large lighting surface.

With its aluminum body structure and integrated design details, Style P 1230 adds a distinctive character to architectural projects. Thanks to its suspended mounting structure, it stands out as a striking design element in offices, commercial and social spaces.

Offering different color temperature and control options, the Style P 1230 Series adapts to project-specific lighting scenarios while combining functional and aesthetic lighting solutions.
