

DUET LONG

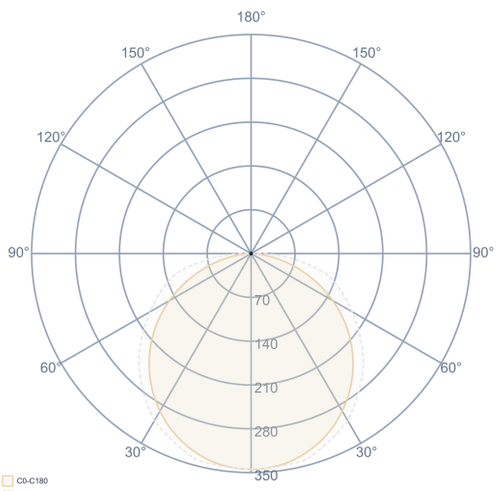

02128

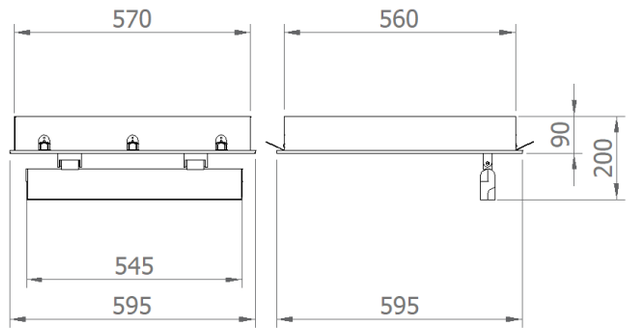

Spot and General Lighting Fixtures

Duet Long is a unique architectural lighting solution that combines general lighting and accent lighting in a single unit. Thanks to its adjustable lighting module, light can be directed to the desired point, while its diffuser structure simultaneously meets general lighting needs. Its recessed mounting design offers a simple and modern look that integrates seamlessly with the ceiling. It is especially designed for projects where different lighting needs must be met in the same space. It provides flexible usage possibilities in corridors, shops, offices, and areas where architectural accents need to be highlighted.

With its design unique to İkizler, Duet Long offers both aesthetics and functionality in architectural projects by combining adjustable accent lighting and homogeneous general lighting in a single product.
