Modular Square Surface Mounted Spot Light Luminaire

The PERLA-SK Series is a professional surface-mounted spotlight solution developed for architectural projects, featuring a square-shaped, deep reflector structure and an optical design that provides low glare. Its modern formula, distinctly separated from the ceiling, offers controlled and comfortable lighting while giving the space a strong architectural character.

With single, double, and triple module options (SK1, SK2, and SK3), it provides flexible lighting solutions. Thanks to its modular structure, different light distributions and spatial arrangements can be created while maintaining the same design language.

Available in white and black body alternatives, the PERLA-SK Series adapts to different architectural concepts and can be used in shops, offices, galleries, social areas, and commercial projects for both general and accent lighting applications.

General Information		Electrical Info		Lighting Technology	
Housing	Aluminum Injection	Power	11-33W	Light Output Angle	35°
Frame	DKP Metal Sheet	Power Factor	>0.95	UGR Value	UGR ≤ 22
Optics	Polished Reflector	Light Source	COB LED	CRI [Ra]	CRI ≥ 80
Paint	Electrostatic Powder Coating	Cabling	Halojen-Free	Color Bin Value	Mc Adams ≤ 3
Insulation Class	Class II	Input Voltage	220-240V AC / 50-60 Hz	Optional	DALI / 1-10V CRI>90 , 2700K~6500K , Tunable White Emergency Lighting Kit
Product Dimensions [mm]	100(W)x100/200/310(W)x130(H)	LED Driver	Constant Current		
Mounting Type	Surface	Ambient Temperature	-20°C / +50°C		
Mounting Part	Screw Dowel Set	LED Lifetime L70	>50.000 Hour		

Order Code	W	Lm	Angle	CCT	WxLxH (mm)	Product Type	Kg
