Double Body Construction - Maximum Protection

Bold IP66 is a professional waterproof luminaire developed for ease of maintenance and high durability. Thanks to its double aluminum profile structure, the LED and electrical equipment are located on an inner profile independent of the outer housing. This allows the inner module to be removed and maintenance quickly by opening only the side covers, without removing the tempered glass.

The anodized aluminum housing, tempered glass with silicone sealant, and self-sealing special side cover design ensure IP66 protection. Its drilling-free mounting structure and ±90° adjustable bracket make it easily adaptable to various applications. It is a reliable and long-lasting lighting solution for tunnels, subway lines, high-speed rail routes, underpasses, and industrial facilities.
