System Integrity - Continuity in Design

Runnel Blind Cover is a complementary module developed to protect system integrity in uninterrupted lighting (trunking) systems where the lighting unit is not used. It maintains the uninterrupted and aesthetic appearance of the line by being mounted on the energy carrier unit.

Thanks to its structure that does not contain LEDs and optical lenses, lighting is used only at the points where it is needed, while maintaining the same profile form in other parts, creating a regular and holistic line. Thanks to its modular structure, it can be easily installed and provides system flexibility by replacing it with lighting units when necessary. It is the ideal solution that completes the architectural integrity of trunking systems in warehouses, logistics centers, production facilities, markets and large commercial areas.

IP 40 IK 08

General Information	
Housing	Aluminum Profile
Side Cover	PC Injection
Product Dimensions [mm]	65(W) x 38(H)
Mounting Type	Surface and Pendant
Mounting Part	Stainless Spring Steel

Electrical Info

Lighting Technology
Optional

Order Code	L (mm)
07200.000.000.004	1133
07200.000.000.005	1433
07200.000.000.006	1693

Verilen tüm elektriksel değerler nominal değerlerdir. Işık akısı ve bağlı elektrik yükü +/- %10 luk bir başlangıç toleransına tabidir. Renk sıcaklığı toleransı: +/-150 K.
