

FEDORA-SQ

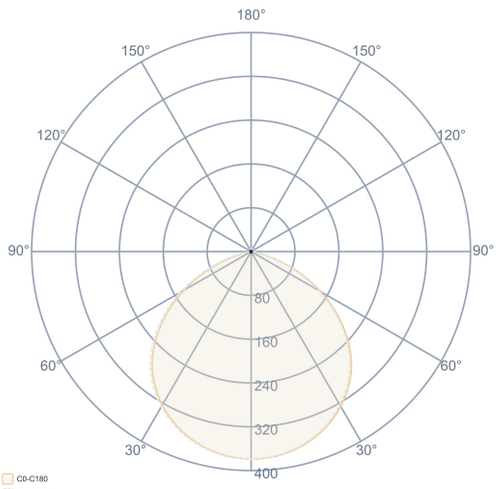

03170

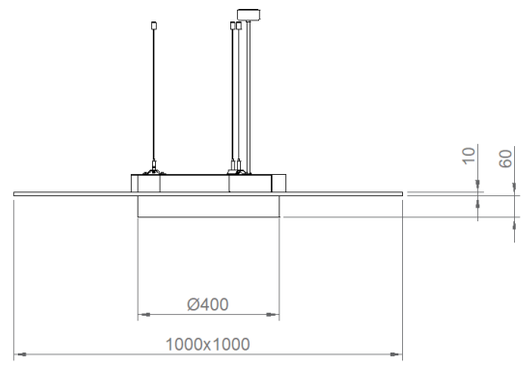

It combines light and acoustics in a square form

Fedora-SQ combines lighting and acoustics in a single product by integrating the Corvus Inn circular luminaire body with a sound-absorbing acoustic felt panel. Thanks to its semi-recessed design, the luminaire creates an integrated look with the felt panel, adding an aesthetic touch to modern architecture.

Providing homogeneous and comfortable lighting with its opal diffuser, Fedora-SQ reduces ambient reverberation with its acoustic felt structure, creating a quieter atmosphere in work and living spaces. With different felt colors and panel sizes that can be produced according to project needs, it offers an aesthetic and functional hybrid solution for offices, meeting rooms, training areas, social areas, and open office projects.
