## Acoustic Comfort and Low Glare Lighting

Skate-R is a hybrid solution that combines sound-absorbing acoustic felt panels with high-efficiency LED lighting in a single product. Thanks to its glare-controlled reflector and lens optics, it offers visual comfort with a UGR≤16, while the acoustic felt panel reduces echo, improving sound quality in working environments.

It adapts to architecture with different felt colors and customizable panel sizes. It provides both acoustic treatment and high-quality lighting solutions in a single product for open offices, meeting rooms, training areas, and social living spaces.
