Pendant Profile with Micro-Prismatic Lens

The Lightline 58 MC Series, with its 58 mm profile width, provides a powerful lighting effect, especially in large spaces, and enhances architectural emphasis. Thanks to its microprismatic lens structure, it distributes light in a controlled manner, reducing glare, and provides high visual comfort in workspaces with a UGR≤19 value.

The aluminum body structure and the side cover design with concealed screw details give the product a simple and integrated look. Its suitability for continuous line applications offers flexible solutions in straight, corner, or custom geometric designs. Different color temperature and control options allow for the creation of project-specific lighting scenarios.
