Smart Lighting for Modern Cities

Lasting-M is designed for performance, energy efficiency, and long-lasting use in road and environmental lighting projects. Its compact structure and optical system provide safe and homogeneous lighting for driveways, site roads, parks, car parks, and pedestrian areas.

With its aluminum injection housing, tempered glass protection, and efficient PMMA optical lens system, it operates reliably in challenging outdoor conditions. Asymmetrical light distribution ensures that light is directed only to the required surface, reducing light loss and increasing energy efficiency. Available in 60W, 75W, and 100W power options, it combines low energy consumption with high lighting performance, achieving system efficiencies up to 140 lm/W. Thanks to its IP66 protection class and IK08 impact resistance, it offers superior durability against rain, dust, and harsh environmental conditions.
