Smart Lighting for Modern Cities

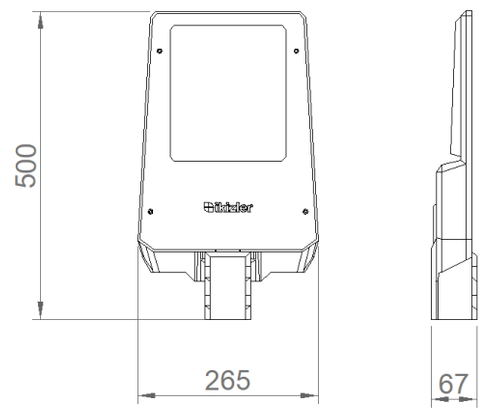

Lasting-L is designed to offer high light output, energy efficiency, and long service life in road and environmental lighting projects. Thanks to its large optical surface and high light output, it provides safe and homogeneous lighting for main arteries, city roads, large parking lots, industrial facilities, campuses, and open areas.

Its aluminum housing, tempered glass protection, and efficient PMMA optical lens system ensure reliable operation in challenging outdoor conditions. Asymmetrical light distribution directs light to the required surface, reducing light loss and contributing to maximum lighting performance. It offers a reliable and long-lasting solution for municipal roads, boulevards, large open areas, parking lots, industrial zones, and environmental lighting projects.
