RUNNEL-End Cap

72429

A Safe and Aesthetic Complement to the System

Runnel Termination Caps are designed to provide a safe and aesthetically pleasing termination at the ends of trunking lighting systems. Thanks to their PC injection molding, they offer durable use while completing the system's integrity by covering the open ends of the energy carrier profile.

Their easy-to-assemble structure speeds up the installation process and provides a clean finish to the trunking line. They are a complementary accessory that ensures a safe, organized, and professional-looking completion of trunking lighting systems.
