IP54 Linear Lighting Luminaire

The Waterline 070 Series is an aesthetically pleasing linear lighting solution offering IP54 protection thanks to its special silicone-sealed diffuser design. This unique structure provides high resistance to dust and moisture while creating a homogeneous and comfortable light distribution. Thanks to its double-cover design, the mounting screws are not visible from the outside. The sealing system, compressed with the inner cover, ensures a watertight seal, while the outer cover gives the product a simple and integrated look. A transparent inner cover option allows for uninterrupted lighting in linear applications.

It offers a reliable lighting solution for metro stations, high-speed train platforms, tunnels, pedestrian crossings, and outdoor eaves applications.
